

Masalah Instalasi Realtek HD Audio pada Microsoft Windows SP3

Contributed by Iwan Quadra
Monday, 28 April 2008

Realtek HD Audio driver dikabarkan mempunyai masalah ketika diinstall pada Microsoft Windows Update terbaru SP3, seperti pada seri sebelumnya pada SP2 kadang masalah tersebut juga muncul, ada beberapa opsi yang ditawarkan oleh microsoft pada forumnya untuk menyelesaikan masalah ini.

Detail solusi bisa dibaca di forum microsoft .

Try to install the Audio Driver in the clean boot state. I mean do the follwing steps as may be its possible there can be some background processes of other third party software not allowing the software to install.

- 1.). Click on Start--> Run--> type in " msconfig " . Press ok
- 2). Click on startup tab on the top right. Click on disable all on the bottom, also click on services tab on the top, then click disable all...in the same row put a check mark on " Hide all microsoft services".
- 3). Click on apply and close and let the computer restart automatically.

When the computer screen comes up click on OK on system configuartion wizard and start the install the audio driver once again. Reply back if still the issue persists.
